

# Keeping your Campus Safe

## Enhancing Situational Awareness

### REPORT AN INCIDENT

Quickly report an incident by simply pressing the alert button within InPointe. InPointe supports both emergency & non-emergency incident reporting.

### COMMUNICATE

InPointe enables bi-directional communication between school staff, district resources and external stakeholders through real time alerts and notifications.

### COLLABORATE

InPointe can be shared with users within the school, across the district and with external first responders enabling real-time collaboration between all safety resources, including requesting staff to “check-in” with their status.

### COORDINATE

InPointe provides critical information including incident location, incident type, and individual reporting the incident to enable dispatch of responders with the right skill to the right location.

### SHARE INFORMATION

InPointe provides a map-based view of all active incidents across the district. Incident details including pictures, videos and incidents notes are easily accessible by all authorized users.

## Enabling District-Wide Communications, Collaboration and Information Sharing

InPointe is much more than a mobile panic button. InPointe is a versatile mobile application that will provide a single tool for reporting emergency incidents as well as request assistance for day-to-day situations schools routinely encounter.

### InPointe for Day-to-Day Situations

- Request nurse for minor medical situations
- Request SRO assistance with unruly students
- Event reminders: meetings, early closings, etc.
- Report potential hazards requiring maintenance (playground equipment)

### InPointe for Emergency Incidents (Bomb Threats, Active Shooter, Weather)

- Enable to report incident, request assistance & call 9-1-1
- Initiate emergency response procedures: lockdown, evacuation, etc.
- Request emergency medical assistance
- Enable faculty & staff to provide updates & details on the incident
  - Location, status, medical needs and number of students
- Request faculty & staff to “check-in”
- Enable SRO and first responder agencies to participate

### InPointe for Safety Drills and Exercises

- Fire alarm & active shooter drills
- Monitor faculty and staff status to measure drill effectiveness

# InPointe: First Step to a District Wide Safety Solution

Your district may not have cameras, panic buttons, or access control systems, at every school, but InPointe can be your first step to providing a district wide school safety solution by immediately delivering a mobile panic button application to all faculty and staff to enable two way communication between schools, district staff and emergency responders.

## InPointe Key Capabilities:

- InPointe is an HTML application that works with any smartphone, tablet or computer that supports browser capability.
- Enables silent panic alert to notify designated users of potential emergency.
- Location of InPointe user is displayed on SafePointe dashboard when alert is received.
- Two-way communication allows real-time updates and instructions to be delivered.
- InPointe alerts can be sent to all or a selected group of users based on location of user and type of incident.
- Attach pictures to messages that are viewable by other InPointe and SafePointe users.
- Incident types and alerting priorities are customizable to meet the needs of the school district.

- InPointe delivers an easy to use interface for submitting alert and calling 9-1-1
- Alert categories can be customized for each district's unique requirements
- Users can update the alert and add photos, videos and text
- Incident command can request check-in from staff and provide critical instructions and updates
- InPointe alerts are displayed within the InPointe web-based dashboard providing real-time information sharing and district-wide situational awareness

When seconds count.....Count on InPointe
